# Bachelor of Science (Mathematical Sciences, With IT) eLearning Programme

SCHOOL OF MATHEMATICS AND APPLIED STATISTICS

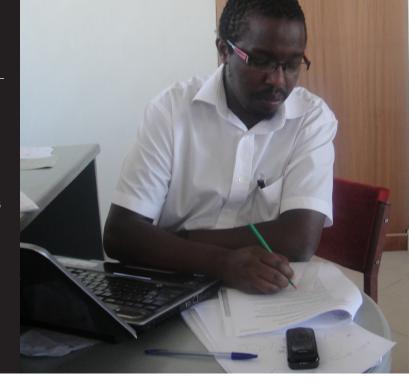

### 1. Introduction

Bachelor of Science programme in Mathematics and Business Studies with IT offers a flexible degree course which provides a foundation in Mathematics and Business Studies.

The first two years ensure that students will have a solid foundation. The flexibility offered in the later years allows the students to adapt their degree according to their own interests, ambitions and ability.

This degree program is designed to engage with and complement the existing programs from both the School of Mathematics and Applied Statistics, and the School of Economics and Business Studies.

### 2. Objectives:

The main objectives of this programme are to:

- (a) Equip the student with a solid foundation in mathematical and business studies.
- (b) Give a flexible program that informs the student about different mathematical disciplines.
- (c) Give students the opportunity to receive a training which prepares them for:
- i. Postgraduate studies and research in mathematics or business studies.
- ii. A career in business.
- iii. Employment in scientific, banking or business areas requiring mathematical or statistical background.

### 3. Admission Requirements.

A student wishing to study Mathematics and Economics must satisfy the minimum University requirements and Faculty of Science regulations. A student must have passed Mathematics in the KCSE or its equivalent with a minimum grade of C+.

### 4. Programme Structure

- (a) In the first two years, students will take 6 core units in each department and in the third year 2 core units in each department.
- (b) In addition to the core units, students will choose elective units, in line with their desired area of specialisation, ensuring that they take a minimum of 14 units a year.

(c) The students will take at least the equivalent of 3 IT units for the first year of study and 4 IT units for each subsequent year of study. These may be SMI units offered by the School of Mathematics and Applied Statistics.

### 5. Examinations

- (a) The University and Faculty of Science common examination regulations shall apply.
- (b) Examinations shall be held at the end of the semester in which the courses are taught.

## 6. Duration of the Programme

- (a) The duration of the programme shall normally extend over a period of four academic years.
- (b) The courses are offered in units in which a course unit is defined as three hour lecture or equivalent per week.
- (c) A student will take a minimum of 14 and a maximum of 16 units in each year of study. Students wishing to take more than 16 units will require Senate approval.

### 7. Key
